**DETAILED ACTION**

***Response to Amendment***

1. Applicant's addition of claim 49 has been fully considered and is entered.

***Response to Arguments***

2. Applicant's arguments see paper 12, filed 14 July 2003, with respect to the rejection(s) of claim(s) 1-6, 8, 10-18, 20-29, 31-38, 40-48 have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Halter, U.S. Patent No. 5,319,705.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 10, 27, 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 10 and 27 recites the limitation "the step of comparing" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 30 recites the limitation "the digitally signed configured security key manifest" in line 2. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 4-8, 10, 11, 13, 14, 25-29, 31, 32, 34, 35, 44, 45, 47, 48 are rejected under 35 U.S.C. 102(b) as being anticipated by Halter, U.S. Patent No. 5,319,705. Referring to claims 1, 2, 4-8, 10, 11, 14, 25-29, 31, 32, 44, 45, 47, 48, Halter discloses a method for multimedia access control wherein every customer that purchases multimedia software is given a unique customer key. The customer key contains a customer unique customer number (subscriber identification data), which is assigned and provided to the customer using means. A customer variant key is derived from the customer key. At the user processor, the keys and encrypted file(s) are initialized and made available to the file recovery program (security key manifest). The file recovery program decrypts and recovers the file(s) (containing security keys). When a customer purchases addition software (send attribute data, customer number), he/she will receive one or more encrypted data keys (generation of security keys) to permit the encrypted files to be recovered (Col. 5, line 54 – Col. 6, line 19).

Referring to claims 13 and 34, Halter discloses that the key used to encrypt the files is given to the customer so that the files can be decrypted (symmetric)(Col. 6, lines 5-24).

***Allowable Subject Matter***

7. Claims 3, 9, 12, 33, and 46 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15-24, 36-43, 49 allowed.
